Current Level: Team Leader / Supervisor

**12/2021 - Now : Head of Development - Photobank VietNam - Full time**

As a head of software development department, my main responsibility is to manage website and AI projects. I work directly with my boss, with the help of a translator, to fully understand requirements and develop a plan for the development and release of software. The technologies we use include NodeJS, AWS, Python, ReactJS, and Serverless.

In my role, I oversee a team of developers and ensure that they are meeting project goals and deadlines. I provide

guidance and support to my team members, and work to resolve any issues that arise during the development process.

One of my primary tasks is to ensure that our software development projects are using the most up-to-date technologies and best practices. This involves staying current with industry trends and advances in software development, and making sure that our team is always learning and improving.

Overall, my job as head of software development involves overseeing complex projects, managing a team of developers, and working with stakeholders to ensure that our software products meet their needs and expectations.
