

# LUU VAN HUY

Fullstack developer

I am a Fullstack java developer and have more than 5 years of experience working in software development. In addition to the field of programming, I have more than 2 years working as a team leader position. I have over 2 years working with major cloud providers like GCP, AWS and DO. I often work in systems that require a large number of cocurrent users and have experience in both programming and server management, so analyzing, designing and implementing performance optimization systems is my strong point.

## Work experience

### SEN

4/2021 - now

#### TEAN LEADER

Main responsibilities:

- Set up and manage company production servers
- Project management, division of work
- Analysis and design of new features
- Learn to develop application technology to the system

- Learning management system
- Meeting management system
- Online conference tool system
- Interactive Content Management System

Technology used:

- Java (spring boot, spring mvc, spring security,...), Nodejs
- Reactjs
- Meteorjs
- postgresql, mongodb, redis

### SEN

9/2020 - 4/2021

#### FULL STACK DEVELOPER

Main responsibilities:

- Participate in feature development and system bug fixes
- Design and integration with 3rd systems

Main projects:

- Learning management system

Technology used:

- Java (spring boot, spring mvc, spring security,...), Nodejs
- Reactjs

### AureoleInformationTechnology Inc

2018 - 2020

#### SOFTWARE ENGINEER

Main responsibilities:

- Develop business management software based on web interface using J2EE, J2EE and Web font end technology like JSF, javascript.
- Develop a vehicle resercation system based on microservice architecture using java spring boot framework.

- Develop hybrid app using Ionic (Angular and cordova).
- System development on open faas platform (python)

Technology used:

- Java (spring boot), J2EE, FSF, python
- Angular

## ***Education***

2014 - 2018

**MAJOR: SOFTWARE ENGINEER**

TON DUC THANG UNIVERSITY

## ***Skills***

### **Back-End**

- Java (Spring boot, Spring mvc, J2EE,...)
- Node JS

### **Font-End**

- Html, css, js,..
- Angular/ react

### **DATABASE**

- PostgresSql
- Oracle
- MongoDB
- Redis

### **Cloud Server**

- Have more 2 years working with Google, Digital Ocean, AWS.
- Have experience set up production mode in Ubuntu/CentOS
  - + Tomcat/ Wildfly Jboss
  - + Postgres db, mongo db
  - + Node Js/ react, angular application
- Have experience in set up load balancer, cloudfront, cdn , google storage, S3, firebase,...

### **Other**

- Redis, MQTT, elastic search, firebase,...
